

# MAX WIND IDROJET

PERFORMANCES	MAX WIND IDROJET
Hourly efficiency	7200 m <sup>2</sup> /h
Autonomy	8 h
Length without chariot with washing bar	1810 mm
Length without chariot and without washing bar	1690 mm
Length with two-wheel chariot with washing bar	2735 mm
Length with two-wheel chariot with washing bar and waste bin	3170 mm
Width with standard wheels	900 mm
Width with garden wheels	1020 mm
Height	1024 mm
Washing bar width	800 mm
Empty weight	260 Kg
Weight with AGM 4x6V 240 AH batteries	390 Kg
Two-wheel chariot weight	52 Kg
Steering radius without chariot	1250 mm
Steering radius with two-wheel chariot	2500 mm
WASHING	
Water tank capacity	2 of 105 L each
High pressure washing lance	8L/100 bar
Washing lance dimensions	
Hose lenght	1200 mm
Pressure water pump adjustment	da 50 a 100 bar
Washing lance nozzle	5 (fan/rotating)
Washing range with orientable bar	900 mm
TECHNICAL DATA	
Motor power & Supply	LifePO <sub>4</sub> , AGM or lead-acid 24 Volt Batteries
Traction	Electric three-phase AC 1.200 W
Three-phase pump	1.700 W
Maximum speed	0-8 Km/h
Work climbing ability	20%

## WASHING MACHINE ELECTRIC SIDEWALK

METAL FRAME

FOR URBAN  
SPACES

SANITIZER USE

Max Wind Idrojet is the first fully electric sidewalk washing machine. Compact, harmonious and ergonomic, it is the ideal solution for cleaning and washing pedestrian areas, car parks and any small and medium-sized area.

Equipped with a front washing bar with 5 nozzles and a high pressure lance with 12 m flexible hose, it allows to wash and disinfect any type of surface and to reach difficult corners.

# MAX WIND IDROJET

## WASH LANCE

The washing lance with automatic hose reel of 12 m allows you to reach the less accessible areas. Fan or rotating nozzles are quickly replaced.

## SIMPLE TO USE

The controls are intuitive and accessible.

## SANDBLASTING KIT

By connecting a hose immersed in a bag of abrasive material to the water jet gun, it is possible to carry out the sandblasting operation. This procedure is ideal to remove graffiti from buildings' exterior.

## ON-BOARD BATTERY CHARGER

Equipped with on-board single-phase charger.

## WATER TANK DISINFECTANT

2 large tanks with a total capacity of 220 L. The filters supplied and the large upper openings allow easy inspection. The 5 L disinfectant tank allows the machine to be used for sanitizing activities.

## WASHING BAR ADJUSTABLE

The AISI 304 steel bar is positioned on the front. Equipped with 5 nozzles, the pressure is adjustable from 5-100 bar and can be swiveled.

## QUICK RELEASE TROLLEYS

According to requirements, two types of trolleys with ergonomic seat are available:

- with seat and an accessory compartment
- with seat and waste bin.

## SIMPLE MAINTENANCE

The fairing is easily removed and it facilitates the ordinary maintenance operations also for not specialized operators.

## METAL FRAME

The solidity of the frame allows work in difficult spaces.

## 100% ELECTRIC

Conceived to be electric only, Max Wind Idrojet reduce CO2 and noise emissions.

## EASY TO TRANSPORT

The small size allows Max Wind Idrojet to be transported even in small vans, avoiding the use of vehicles that require specific licenses.
