

## DISINFECTION KIT

### DISINFECTION KIT

The Agile Max 108 can be equipped with a disinfection system that, added to the normal cleaning operation allow to clean and disinfect in one step.

The kit is composed of a rear washing bar with 4 nozzles (two lower and two lateral) connected to a 70 liter water tank. A washing lance allow the distribution of the solution even on vertical surfaces.

The kit consist of:

1. A 24 volt water pump
2. A 70 l water tank
3. A steel bar with 4 interchangeable fan nozzles
4. A low pressure washing lance.
