

## DUST CONTROL SYSTEM

### DUST CONTROL SYSTEM

The nebulization system on side brushes avoids the lifting of dust during work.

It is applicable to all Handy Max 73 models.

You can add a scented disinfectant to existing water in the tank.

It is activated, only with the brushes running, by means of a simple lever on the control panel.

The Kit consists of:

1. 15 L water tank
2. A steel bar with 2 interchangeable fan nozzles
3. Stainless steel support
4. 24 volt water pump
5. A protective steel front
6. A tank strap
